### Answer each of the following questions.

Australia has two separate Indigenous groups. Indigenous is a word that means ‘originating or living naturally in a place’. These two groups originate from the mainland of Australia (Aboriginal people) and the islands in the Torres Strait (Torres Strait Islander people).

Although these two groups of people are different, there are some things about their cultures and things that are important to them that they share. Here are some examples:

- **Their history.** Both groups of people have had to struggle to get their voices heard because although they lived in their land for tens of thousands of years, part of the Aboriginal and Torres Strait Islander history involves having to deal with lots of settlers coming to their land.

- **A spiritual connection to the land.** Both sets of people have a very special relationship with the land (and the sea). There are many stories and beliefs linked with the land.

- **A varied culture.** Both Aboriginal and Torres Strait Islander peoples have a rich culture. Art, dance and music have always been important to them.

1. Think about the word ‘indigenous’ and tick the sentence that is true.
   - Fish are indigenous to the sea.
   - Cows are indigenous to rivers.

2. How long have there been Aboriginal and Torres Strait Islander peoples in and around Australia?

3. Why have both sets of people “struggled to get their voices heard”?
